Capacity Undesignation For System Sales – Illustration

[Steady State]

(UDR)

= Undesignated Network Resource

(DR)

= Designated Network Resource

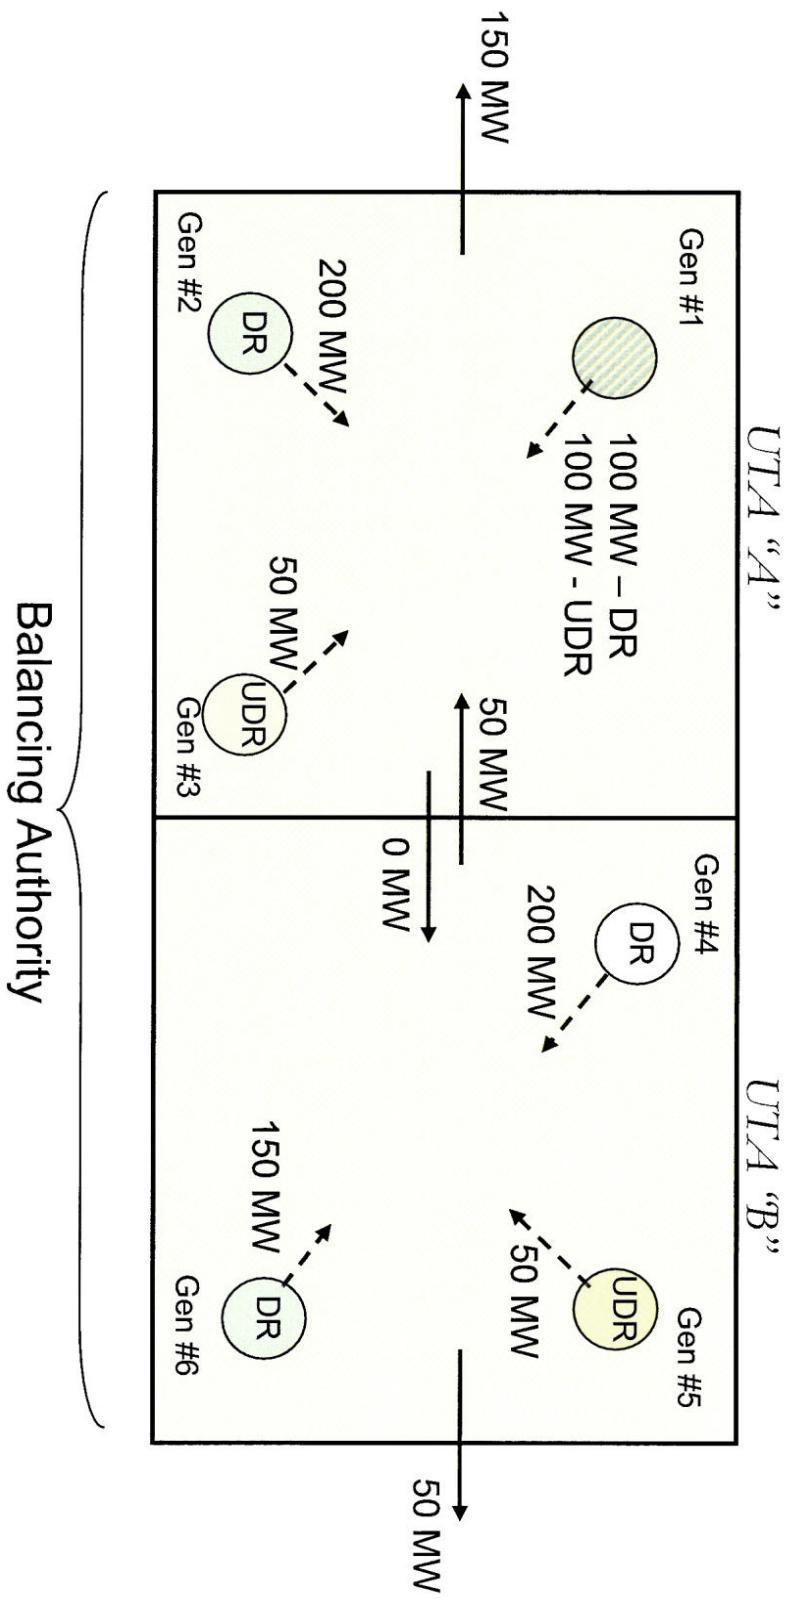

----- = Un-posted Path (no constraint)

→ = Posted Path (constraint)

UTA = Unconstrained Transmission Area

Capacity Undesignation For System Sales – Illustration

[System Condition #1]

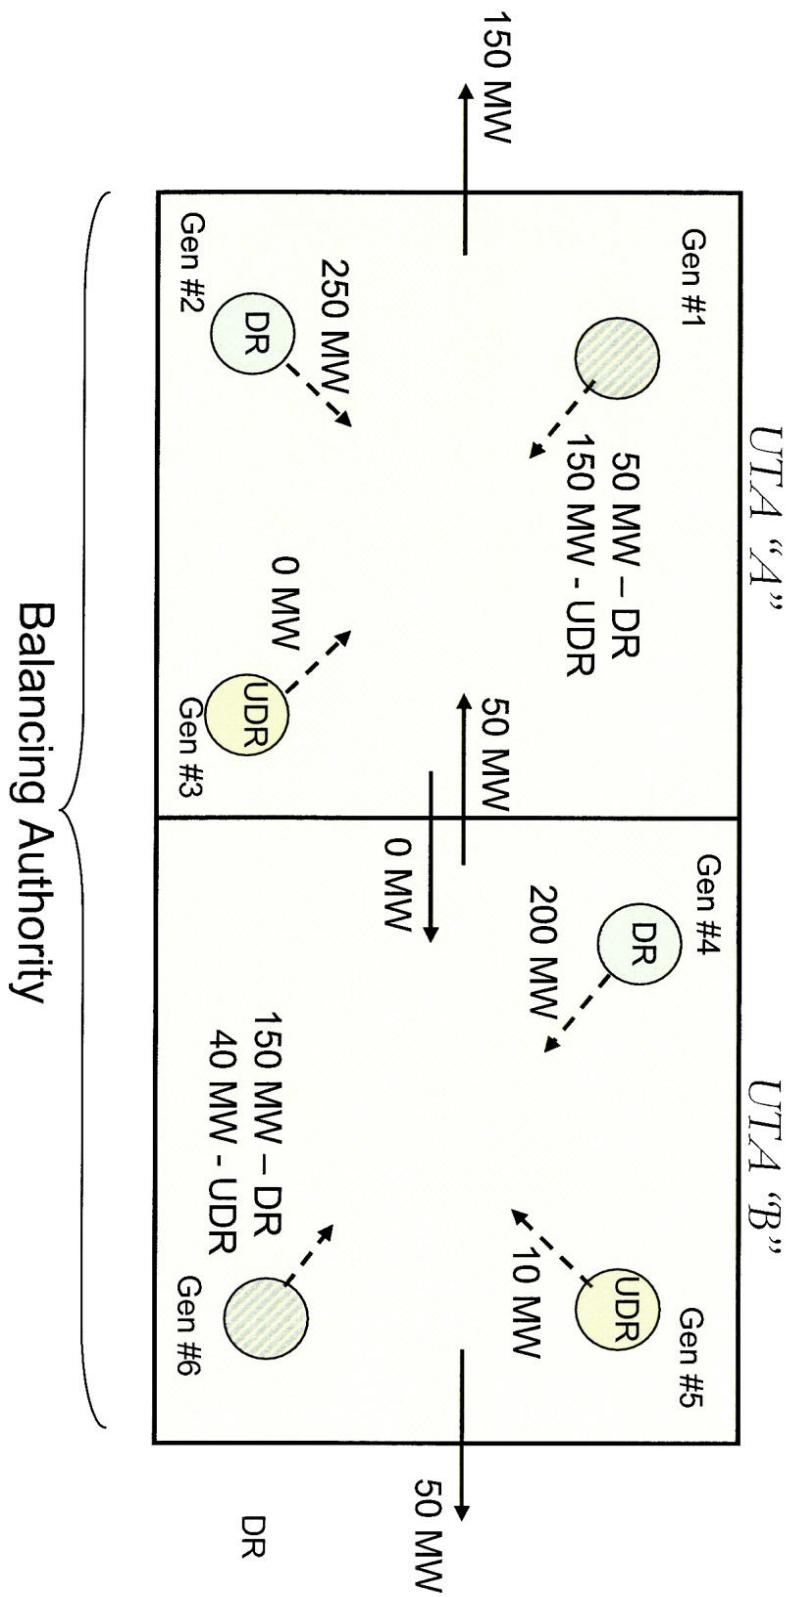

(UDR) = Undesignated Network Resource -----> = Un-posted Path (no constraint)

(DR) = Designated Network Resource ——————> = Posted Path (constraint)

UTA = Unconstrained Transmission Area

Capacity Undesignation For System Sales - Illustration

[System Condition #2]

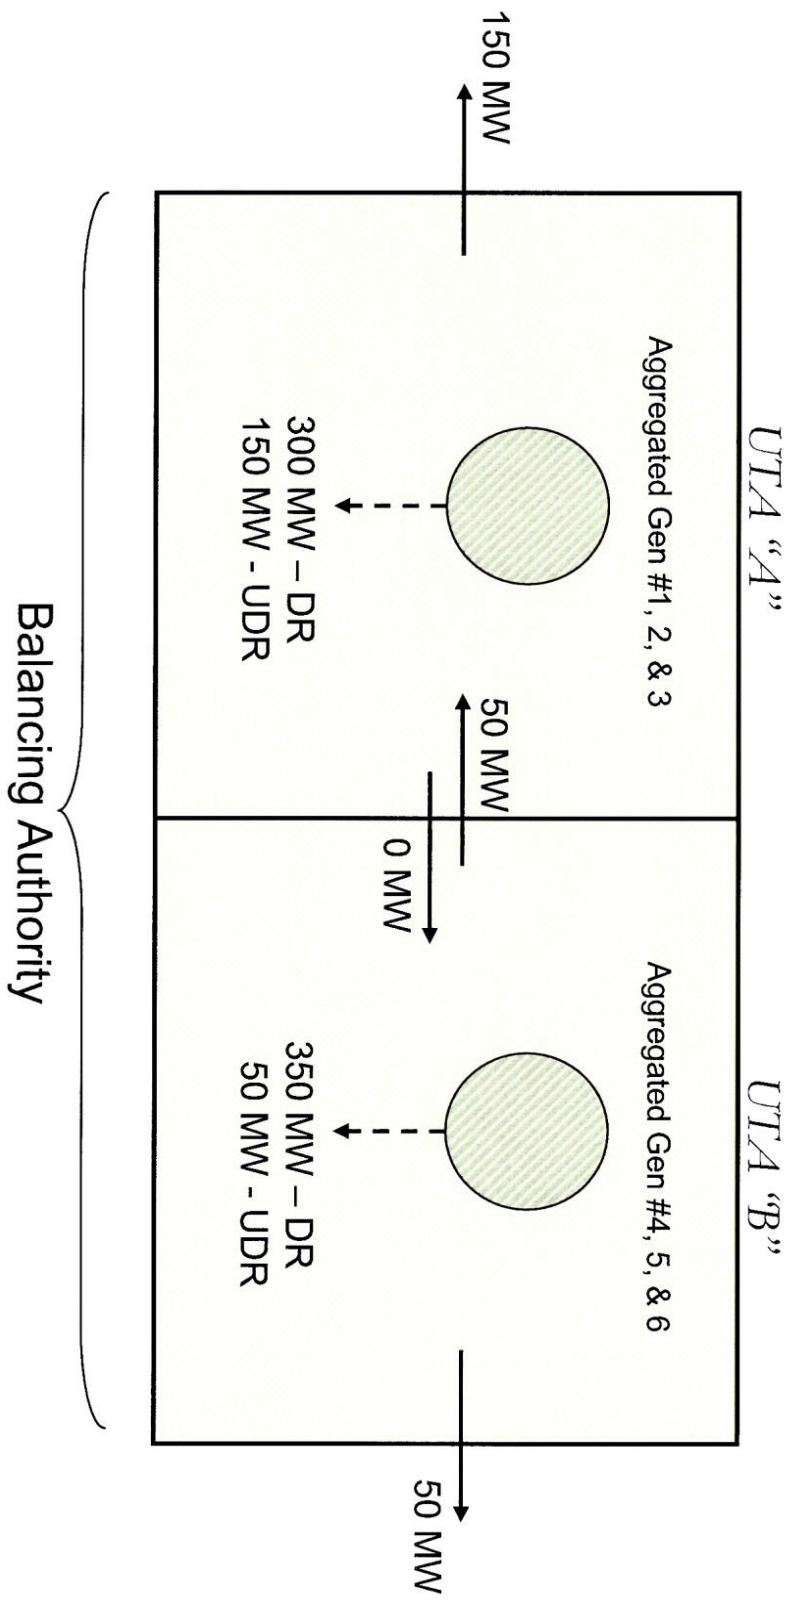

(UDR) = Undesignated Network Resource -----> = Un-posted Path (no constraint)

(DR) = Designated Network Resource → = Posted Path (constraint)

UTA = Unconstrained Transmission Area

Capacity Undesignation For System Sales – Illustration

[System Conditions #1 & #2 – Aggregated Capacity Undesignation]

(UDR)

= Undesignated Network Resource

----- = Un-posted Path (no constraint)

(DR)

= Designated Network Resource

→ = Posted Path (constraint)

UTA = Unconstrained Transmission Area
